

London Borough of Sutton Local Validation List

In addition to the National requirements, the Local Validation List clarifies the additional information required to accompany a planning application so that it can be validated. This will then enable the Local Planning Authority (Development Management) to begin its determination of the planning application. The scope and degree of the information required will vary for each application. The London Borough of Sutton asks that you submit applications electronically using the <u>Planning Portal</u> as its preferred submission method.

Developers and applicants are encouraged to engage in pre-application discussions with the Council before an application is made through the <u>pre-application advice service</u>. The pre-application advice service will assist in tailoring the list of requirements that apply to your development. Please read the Local Validation List carefully before submitting a planning application and please note that not all the information itemised in the local list will be required for every application. This document is divided into four parts as follows:

Part 1 - This is a quick guide for the most common types of applications.

Part 2 - The application types guide will provide details of when specific documents are required based on the proposed scheme.

- Advertisement
- <u>Change of Use</u>
- Householder
- Lawful Development Certificate
- Major (10 or more dwellings or 999+sqm floorspace)
- Minor (1-9 dwellings or up to 999sqm of floorspace)

Part 3 - The document guide will detail what is expected for each requirement and offer further help and guidance.

Part 4 - A guide for all other types of application.

- Details Reserved by Condition
- Listed Building Consent
- Minor Material Amendment (S73)
- Non-Material Amendment
- <u>Permission in Principle</u>
- Prior Approval
- Works to Protected Trees
- Outline Permission Please email planningvalidation@sutton.gov.uk to agree the required documents prior to submitting

If the relevant information contained within the Local List is not provided with your submission, the processing of your application will be delayed and the application will be made invalid. If you have a query with any of the requirements listed below, or feel that a certain element is not required on your submission, please contact us prior to submission and we can advise the best way forward. You should email us at planningvalidation@sutton.gov.uk

Please note that if your application is found to be invalid on submission, an administration fee will be charged and you will be given 28 days in which to make the required changes to the application and pay the administration charge will result in your application being returned.

	 Each plan should be; Scaled appropriately (metric) including the stated scale or scale bar Given a unique drawing number Titled All plans must be accurate and correlate with partner drawings and other supporting documentation submitted. 	
Streetscenes - Existing & Proposed (appropriately scaled)	 These plans should provide a view of the development site showing relative height and land levels of the new development in comparison to neighbouring properties from the public highway. Each plan should be; Scaled appropriately (metric) including the stated scale or scale bar Given a unique drawing number Titled All plans must be accurate and correlate with partner drawings and other supporting documentation submitted. 	Government guidance All plans must be sub Other document type will not be accepted.
Window Sections - Existing & Proposed (appropriately scaled)	 Where a proposal involves new or replacement windows on a Listed Building or a Locally Listed Building, or replacement windows within a Conservation Area, section drawings must show the depth of the existing and proposed window and any frame/sill. Each plan should be; Scaled appropriately (metric) including the stated scale or scale bar Given a unique drawing number Titled All plans must be accurate and correlate with partner drawings and other supporting documentation submitted. 	Government guidance All plans must be sub Other document type will not be accepted.
Supporting Documents	Requirements	Further Advice
Acoustic and Vibration - Impact Assessment	An Impact Assessment will likely be required where there is significant noise use such as food/ drink/ entertainment and leisure uses, industrial uses, day nurseries, places of worship, schools and colleges. An Impact Assessment will also likely be required where a proposal generates a significant amount of traffic and EIA development. Vibration impacts will likely have to be considered on certain types of applications such as those adjacent to railway lines or busy roads and where there are vibration sensitive uses. The Impact Assessment should be carried out by a qualified person and include, among other matters, an assessment of the existing background noise/vibration level over a 24 hour period, predicted noise levels, predicted vibration levels and identification of any mitigation required. The assessment should demonstrate compliance and make reference to relevant British Standards. In addition, for applications for new developments where late night premises are structurally attached or in close proximity to proposed residential properties and live or recorded music (other than background) is likely to form part of the proposed use the applicant should submit an acoustic and vibration report as part of their application. This would apply to applications where new residential properties are being introduced above, adjacent or in close proximity to existing late night premises that currently provide live or recorded music. The report shall demonstrate a sound insulation scheme that ensures that a (1) typical maximum noise levels of the	The Institute of Acoust The Association of N Consultants Sutton's Environment All submitted docume photographs). 	 proposed date), that result in loss of onsite biodiversity value ('degradation'), and where they have: a statement to the effect that these activities have been carried out; the date immediately before these activities were carried out; the pre-development biodiversity value of the onsite habitat on this date; the completed metric calculation tool showing the calculations, and any available supporting evidence of this; a description of any irreplaceable habitat on the land to which the application relates, that exists on the date of application, (or an earlier date); and plan(s), drawn to an identified scale and showing the direction of North, showing onsite habitat (if applicable) 	
	In addition, the London Borough of Sutton requests all onsite and offsite (if applicable) Habitat Plans to be submitted as a GIS shapefile, containing the redline boundary and all onsite habitat, to Greenspace Information for Greater London (GiGL) <u>Data Standards</u> , particularly <u>G021 Site Surveys</u> and <u>G081 Habitat Data Standards</u> .	
	Exemptions - Where applicants consider that the development would not be subject to the biodiversity gain condition, Article 7 of The Town and Country Planning (Development Management Procedure) (England) Order 2015 provides that the applicant must provide a statement as part of the planning application setting out the reasons why they believe this is the case.	
	The planning application form, prescribed by the Secretary of State, provides for these reasons to be set out. An applicant would be expected in this statement to set out what exemption(s) or transitional provision(s) apply to the development. In some cases, the exemption or transitional provision will be evident as they relate to the type of permission. For example, the planning application form for household development already includes a pre-populated statement. In other cases, evidence may need to be provided, especially for the de minimis exemption.	
BREEAM[1] Pre- Assessment Report or BREEAM Interim (Design Stage) Certificate	A BREEAM Pre-Assessment Report or BREEAM Interim (Design Stage) Certificate is required for all major non-residential developments in order to demonstrate that an 'Excellent' rating will be achieved in line with Local Plan Policy 31e. This must be issued by the Building Research Establishment (BRE) or equivalent authorising body.	Sutton Local Plan F Building Research I All submitted docum photographs). Appli formatted plans/doc
Construction Logistics Plan (CLP) - Highway Considerations	 The CLP should include details on the following: Scope of works (including measures for traffic management) Details of access arrangements Loading and unloading of plant and materials Storage of plant and materials Provision of boundary hoarding behind any visibility zones of construction traffic routing. Proposed working hours Any Personal Protective Equipment (PPE) required. Means to prevent deposition of mud on the highway Work programme 	TfL's 'Construction All submitted docun photographs). Applications will be made invalid for incorrectly formatted plans/documents.
Ecological Assessment	As part of the Council's commitment to conserving and promoting wildlife through the Biodiversity Strategy 2020-2025, all planning applications must have consideration to local biodiversity, both habitats and species onsite, and with regard to potential offsite impacts of habitats and species. A suitable ecological assessment (usually, an Ecological Impact Assessment - EcIA) is required for sites that are likely to have a negative impact on wildlife and habitats. The provision of an EcIA / equivalent assessment is likely to be required in addition to the provision of a Biodiversity Net Gain Statement. All surveys and impact assessment should be carried out in accordance with Sutton Council's Validation Information: Biodiversity. This includes smaller works, such as roof or loft changes, which may affect bat roosts, which will require at least a Preliminary Roost Assessment (PRA). Sutton requires developments to provide additional features for wildlife, including swift bricks, bat roosts etc. (please see Biodiversity Strategy 2020-2025 for more information), The planning authority has a duty to consider the conservation and promotion of biodiversity in all its duties though the NERC Act 2006 and when determining a planning application; this includes delivery of the Environment Act 2021 and having regard to the safeguard of species protected under the Wildlife and Countryside Act 1981 (as amended) and Conservation of Habitat and Species Regulations 2017 (as amended).	Biodiversity Validation Information Government guidance - Protected species Biodiversity Strategy 2020-2025 Contact the Biodiversity Team for help All submitted documents should be in PDF format (including photographs). Applications will be made invalid for incorrectly formatted plans/documents.
Energy Statement	 An Energy Statement should: Demonstrate how the development will minimise CO2 emissions in line with the Mayor's energy hierarchy; Demonstrate how the relevant CO2 reduction, fabric energy efficiency and renewable energy targets will be met in line with Local Plan Policy 31; For major developments located within decentralised energy (DE) opportunity areas or within close proximity (500m) to an existing or planned district heating network, demonstrate that the council's 'DE Protocol' in Appendix 10.B of the Local Plan has been applied to ensure that the development is 'future-proofed' to enable future connection to the network; For major residential developments, demonstrate how the council's 'zero carbon' target will be achieved and the sum to be paid into the council's carbon offset fund based on a price of £60 per tonne over 30 years. Suttons 'Technical Guidance Note 1 for Developers on Carbon Offsetting' within the note 'Building a Sustainable Future' provides further details on carbon offsetting. Be accompanied by 'as-designed' Building Regulations Part L outputs prepared under the Standard Assessment Procedure (SAP) or Simplified Building Energy Model (SBEM) as appropriate. 	GLA Guidance on Preparing Energy AssessmentsSutton Local Plan Policy 31 (Carbon and Energy)NPPG on climate change mitigation and adaptationBuilding Regulations 2013 Approved Documents L1A, L1B, L2A and L2BLondon Heat Network ManualSuttons Building a Sustainable Future - Technical Guidance NoteAll submitted documents should be in PDF format (including photographs). Applications will be made invalid for incorrectly formatted plans/documents.
Environmental Impact Assessment (EIA)	The Environmental Impact Assessment Regulations set out the circumstances in which an EIA or EIA Screening Opinion is required. The need for an EIA shall be determined through a formal Screening Opinion for all Schedule 2 development.	Government guidance - Environmental impact assessments The Town and Country Planning (Environmental Impact Assessment) Regulations 2017

	An EIA may comprise of other more specific assessments detailed within the local list below. Where an EIA is required, Schedule 4 of the regulations sets out the information that should be included in an Environmental Statement, however, applicants are advised to also complete a Scoping Opinion to fully understand the information requirements.	All submitted docume photographs). Applic formatted plans/docu
	Please note that for applications for non-material amendments (s96a) and minor material amendments (s73) for proposals that were originally EIA development, further details will be required to show that the proposed changes to the scheme have been screened and that the impacts of the development, as altered, have been assessed to determine whether they would give rise to any further or different significant impacts. This will take the form of an addendum to the Environmental Statement outlining the alterations and assessing the impact of these against each of the previous EIA conclusions.	
Financial Viability Assessment (FVA) and Affordable Housing Statement	The Mayor's current Affordable Housing and Viability SPG August 2017 states that where less than 35% affordable housing is proposed (50% on public land) a full Financial Viability Appraisal (FVA) shall be provided to the Council for independent assessment.	<u>Mayor's Affordable H</u> Policy 8 and 38 of th
	It is recommended that the applicant enter into early discussions with the Local Planning Authority (LPA) for advice on affordable housing requirements and housing needs. Details should be provided of the size, number, type, tenure and location of any affordable units proposed. Where a viability model is used the Council should be provided with the full working models and/or all of the assumptions and calculations so these can be independently interrogated and tested.	All submitted docum photographs). Applic formatted plans/docu
	Please note that all submitted FVA's will be published on the Council's planning register in line with the Mayors SPG.	
	As a minimum, the FVA should include the following:	
	 Gross Development Value Build Costs (QS Schedule) Land Value (existing use value plus) Residual values (including comparables) Commercial yields /rents (including comparables) Competitive return to developers Professional Fees / Marketing costs Evidence and benchmarks to support all values and costs included in the assessment. Justification for all assumptions used in the FVA. A viability assessment model which is capable of full interrogation by the Council and its advisor. Itemised S106 Heads of Terms and Community Infrastructure Levy (CIL) Any capital / grant contributions 	
	 Build / sale programme Details of any Registered Housing Provider Scenario testing of the deliverability of the development if the FVA shows a deficit 	
	PLEASE NOTE: The London Borough of Sutton may use an external party to independently assess the submission, the assessment fees shall be paid by the applicant.	
	PLEASE NOTE: All submitted FVA's will be published on the council's Planning Register in line with the Mayors SPG.	
Fire Safety Strategy (Part A)	In March 2021 the Mayor of London published his Local Plan which now forms part of the Local Plan Framework, policy D12 deals with matters of Fire Safety. In addition to this on 1 August 2021 the NPPG 'Fire Safety and High – Rise Residential Buildings was produced pursuant to the update of the Town and Country Planning (General Management and Procedure and Section 62A Applications) (England) (Amendment) Order	All submitted docum photographs). ance - Historic environment

Planning advice

	 A description of the significance of the heritage asset with reference to the relevant historic record. An explanation of how the proposed development protects/enhances the heritage asset. It should demonstrate how the proposed development responds to the scale, proportions, height, massing, historic building lines, the pattern of historic development, use, design, detailing and materials of the heritage asset. For works to a listed building, a description on how the proposal retains the integrity and significance of the building as a whole, the location and hierarchy of rooms, historic floor levels, the structure of the building including foundations, fabric as well as features such as original staircases, original roof structures and other features identified as being of significance. An explanation of how the proposal seeks good/exceptional design that integrates with and makes a positive contribution to the heritage asset. A description of the impact of the development on the heritage asset. 	All submitted docum photographs). Applic formatted plans/docu
Landscaping Scheme	You must provide details of the planting of trees and shrubs, surface materials, boundary screen walls and fences. The scheme should describe the; • Materials • Species • Tree and plant sizes, numbers and planting densities • Levels, gradients and any earthworks required • Timing of the implementation of the scheme It should also include proposals for long-term maintenance and landscape management. Where applicable, this should cross-reference with SUDS Strategy and the Biodiversity Net Gain Statement and a Green Space Factor assessment. Landscaping schemes should be integral to good design and considered at the earliest stage of the design process. The retention of trees and high quality landscaping schemes should be a positive part of the design process.	All submitted docum photographs). Applic formatted plans/docu
Lighting Assessment	 The assessment should provide details of the external lighting or floodlighting, including: Hours of operation Light spillage (including horizontal and vertical light spill, clearly scaled) Light levels Column heights Layout plan with beam orientation and light maps (isolux contour maps to 0.01lux) Equipment design Impact on nearby dwellings, wildlife, habitat or roads and use of planting to mitigate effect(s) 	All submitted docum photographs). Applic formatted plans/docu
Parking Management Plan / Strategy	 The Parking Management Plan should provide details of the following: Existing and proposed vehicle parking including provision for accessible parking (cars, motorcycles and cycle spaces). Details (including plans) of the number of car club spaces and electric vehicle charging points (both active and passive) (if none are proposed then this should be stated in the submission) Details of measures to manage their use (i.e. ensuring that informal parking does not take place in any other areas of the site not dedicated as parking spaces) Details of measures to control potential on-street parking Details of Parking Surveys should be submitted if there is significant parking stress in the area (Please note: All fees for the London Borough of Sutton shall be paid by the applicant to independently assess the submitted parking survey) 	All submitted docum photographs). Applic formatted plans/docu

	The purpose of a Parking Management Plan is to show how parking is to be managed in order to ensure that a development does not increase on-street car parking and congestion and that any impacts can be appropriately managed. It should also ensure that parking is appropriately allocated within a development to those users who are in most need such as disabled users and family units.	
Planning Statement	The planning statement should explain the principles of and justification for the proposed works. The statement should include information explaining how the proposed development accords with the policies of the development plan and any relevant Supplementary Planning Documents.	All submitted documphotographs). Applic formatted plans/docu
	It should also include information regarding commercial activities including anticipated staffing levels, site visitors, proposed hours of operation etc.	
Refuse Store Plans (appropriately scaled) / Details	These plans should show the detail of the proposed layout and the full exterior/elevations of all sides of any store proposed that is contained within an external outbuilding.	Government guidand
	If the store is not contained within an external outbuilding, an indicative drawing/brochure/photo may be provided.	All plans must be sul Other document type will not be accepted.
	Each plan should be;	
	 Scaled appropriately (metric) including the stated scale or scale bar Given a unique drawing number Titled 	
	 All plans must be accurate and correlate with partner drawings and other supporting documentation submitted. 	
Retail Impact Assessment	The assessment should include the impact of the proposal on existing, committed and planned public and	Paragraph 89 of the
	private investment in a centre or centres in the catchment area of the proposal and the impact of the proposal on town centre vitality and viability, including local consumer choice and trade in the town centre and wider area.	All submitted docume photographs). Applic formatted plans/docu
	PLEASE NOTE: The London Borough of Sutton will use an external party to independently assess the submission, the assessment fees shall be paid by the applicant.	
Schedule of proposed changes	All such applications shall include a schedule of the changes proposed compared to the original application to be varied. Where applicable, revised drawings should also be provided highlighting the changes proposed.	All submitted documphotographs). Applic formatted plans/docu
Site specific Flood Risk Assessment (FRA)	A Flood Risk Assessment should identify how a development will be designed to cope with flooding and how the risk will be mitigated without increasing the risk elsewhere. It should identify opportunities to reduce the	EA online flood map
- see also SUDS	probability and consequences of flooding.	Suttons Strategic Flo
	The assessment should be in accordance with the NPPF Technical Guidance, identify and assess the risks of all forms of flooding to and from the development and demonstrate how these flood risks will be managed so	NPPG advice on Flo
	that the development remains safe throughout its lifetime, taking climate change into account.

	 and/or after construction for local residents. This should set out the number of the following interventions to be delivered during and/or after the development, the month in which these will be delivered, and further information on how these will be delivered; Number of new local apprentices recruited Number of unemployed / economically inactive residents recruited into vacancies Number of work placements for local school/college students; unemployed / economically inactive residents; or local students undertaking accredited training courses Number of supported internships offered Number of careers events, workplace visits or employer encounters for school / college students; or unemployed / economically inactive residents Training opportunities for residents (excluding apprenticeships) Percentage of workforce that will be local labour (Sutton residents) Skills / labour forecast for the site Other (please specify) Number of supply chain events or interventions to promote opportunities to local businesses Percentage of contract spend which will be with local businesses 	photographs). Applic formatted plans/docu
Statement of Community Engagement	The Statement of Community Engagement will need to demonstrate how the applicant has complied with Sutton's Statement of Community Involvement and show how the views of the local community have been sought and taken into account in the development proposals.	Suttons Statement of All submitted documphotographs). Applic formatted plans/docu
SUDS (Sustainable Urban Drainage System) Strategy (can be provided as part of the site specific FRA where one is produced)	 A SUDS scheme involves the management of surface water run-off and should: Identify all proposed site drainage and flood risk management measures, including SUDS, in order to manage surface water run-off as close to its source as possible in line with the Mayor's drainage hierarchy. Describe how each of the proposed measures will be incorporated as part of the design and layout in order to achieve the council's minimum SUDS performance standards. Include calculations to show that the peak run-off rate for the 1 in 100 year event (plus climate change) will be as close as reasonably practicable to the greenfield run-off rate. Demonstrate that the 1 in 30 year rainfall event (plus climate change) can be contained without flooding and that any flooding occurring between the 1 in 30 and 1 in 100 year event (plus climate change) will be safely contained on site. Provide details of the implementation timetable together with a management and maintenance plan including arrangements for adoption where relevant Designs should be multifunctional to include water quality, amenity and biodiversity benefits Include the design of surface water management systems including Sustainable Urban Drainage Systems (SUDS). 	National non-statutor Sutton SUDS Guidar NPPF, Para 167 All submitted docume photographs). Applic formatted plans/docu
	All SUDS strategies submitted in support of major residential and non-residential developments must also be accompanied by a Drainage Assessment Form (DAF)	
Telecommunication Report	The telecommunications report should provide the following:	Electronic Communit
	 Outcome of any consultation with the local community, including nearby schools and colleges Area of any search and sequential test Details of the proposed structure Technical justification and information about the proposed development. 	Sutton Local Plan Po All submitted docum photographs). Applic

	 For an addition to an existing mast or base station, a statement that self-certifies that the cumulative exposure, when operational, will not exceed International Commission on non-ionising radiation protection guidelines; OR For a new mast or base station, evidence that the applicant has explored the possibility of erecting antennas on an existing building, mast or other structure and a statement that self-certifies that, when operational, International Commission guidelines will be met. 	formatted plans/docu
Transport Assessment (TA)	 The coverage and scale of the assessment should reflect the scale of the development and the extent of the transport implications of the proposal. The TA should provide an assessment of the transport and servicing impact of the development and include: Baseline conditions including PTAL of the site Existing and proposed vehicular and pedestrian journeys to and from the site by all modes of transport Description and analysis of existing transport conditions An analysis on how the proposal will affect the transport conditions Any mitigation / planning obligations required 	Transport Assessme Government guidance assessments All submitted docume photographs). Applic formatted plans/docu
Travel Plan (TP)	A Travel Plan is a long-term management strategy for an organisation or site that seeks to identify actions to deliver sustainable transport objectives The TP should outline the measures that will be put in place to improve access to public transport and reduce the need for vehicle parking associated with the proposal. The Travel Plan should be in accordance with the guidance from TfL.	Travel Plan guidance Government guidance assessments All submitted docume photographs). Applic formatted plans/docu
Tree survey, Arboricultural Impact Assessment (AIA) and Arboricultural Method Statement (AMS)	The tree survey is an appraisal and assessment of tree quality. The arboricultural impact assessment (AIA) is required to clearly identify impacts to trees and provide solutions to minimise or mitigate for these and must include a tree retention/removal plan. The tree survey and AIA must comply with BS5837:2012 Trees in Relation to Design, Demolition and Construction. If the impacts identified in the AIA require tree protection or special working methods, an arboricultural method statement (AMS) and tree protection plan to BS5837:2012 is also required. The tree survey, AMS and AIA should be undertaken by a qualified arboriculturist.	Government guidance The Arboricultural As All submitted docume photographs). Applic formatted plans/docu
Waste Management, Storage and Collection Strategy	There is a requirement to make appropriate arrangements and/or space for the storage and collection of recycling and refuse on site. These details will need to be included on the plans with a collection and management strategy. Reducing carbon and emissions should also be at the forefront of your thinking when devising such a strategy.	All submitted docume photographs). Applic formatted plans/docu
